

FLOOR FOCUS

Top designers and architects across the nation gave ECOsurfaces high marks in a Floor Focus magazine survey of the country's largest design firms. The Top 250 Design Survey reflects feedback from designers and architects at the country's leading firms. It's conducted each year to gain opinions on flooring surfaces and manufacturers in a number of categories, and identify trends that will shape the future of the market.

This year, ECOsurfaces had its best showing ever in the important survey, claiming top 10 spots in a number of key categories including:

#8 for "Kudos" (overall satisfaction)

#8 on "Service"

#9 on "Green Kudos"

#9 on "Design"

In addition, ECOsurfaces was ranked #16 on Best Overall Business Experience and received honorable mention for quality, performance, value and green leadership.

"It's extremely gratifying to see that designers and architects across the country, who are so influential in the building materials industry, consider ECOsurfaces as one of the leading brands in the commercial flooring category," said Art Dodge, president and CEO of ECORE International. "Clearly, this recognizes that our color selection, designs, service, quality and recycled rubber content are valued in the marketplace, as is our distributor relationship with Gerbert Ltd., and its sales force."

"This is great recognition of all the hard work that has been done to manufacture, market and sell our ECOsurfaces line. We should all feel proud of this accomplishment," added Dodge.

ECOsurfaces has appeared in the survey in previous years but has never been ranked so highly in so many categories. A number of high profile projects have installed ECOsurfaces, including the World of Coca-Cola retail store, Atlanta, GA, Dell Children's Medical Center, Austin, TX, a platinum-level LEED certified healthcare project and High Tech High Bayshore, Redwood, CA.

ECOsurfaces Commercial Flooring products are distributed exclusively by Gerbert Limited. Visit www.gerbertltd.com or call 800-828-9461.
