

WALLCARE

CONSTRUCTION/INTERIM CLEAN

For light soiling, wipe the walls with a damp cloth using a neutral cleanser diluted to the manufacturers instructions

For heavy cleaning, use an alkaline cleanser diluted to the manufacturers instructions. For stubborn marks use a deck scrubber, scrubbing brush or doodle bug. Wipe the walls with a damp cloth using clean water and a small amount of neutralising agent such as acetic acid

APPLICATION OF A DRESSING

Under most circumstances the wall will not require a sealer coat of polish. If however it is felt necessary to either provide a protective finish or minimise maintenance a matt finish metallised polish should be applied

Using a damp cloth, the polish should be applied to a previously cleaned surface, as described in construction/interim clean, in an even coat. Do not over apply to avoid runs in the polish

ROUTINE MAINTENANCE

The frequency is dependent upon the rate of soiling.

If lightly soiled, then wipe the walls with a damp cloth using a neutral cleanser diluted to the manufacturers instructions

If heavily soiled, especially with grease, then wipe the walls with a damp cloth using an alkaline cleanser diluted to the manufacturers instructions. Afterwards rinse the walls using clean warm water and a small amount of neutralising agent such as acetic acid

REMOVAL OF DRESSING

Should the dressing have to be removed then a polish stripper, diluted to the manufacturers instructions should be applied to a small section at a time using a wet cloth. The stripping solution should be left on the wall for almost 10 minutes and then the surface should be agitated using a deck scrubber, scrubbing brush or doodle bug which has been pre-wetted in the solution.

Once complete the walls should be rinsed using a damp cloth and warm water and a small amount of neutralising agent such as acetic acid.

Once the whole room has been stripped, a new coat of polish can be applied as described above.

Always follow the Health and Safety guidelines provided.

Do not use strong kitchen degreasers on vinyl surfaces.
